LinkedIn: Shaiharyaar Ahmad | GitHub: Shaiharyaar-github | StackOverflow: shaiharyaar

PROFESSIONAL PROFILE

Highly skilled Frontend Developer with 5+ years of professional experience designing and building dynamic, user-friendly web and mobile applications. Proficient in React.js and React Native, with strong full-stack exposure using Node.js, MongoDB, Express, and Next.js. Experienced in leading technical teams, architecting product flows, and delivering measurable business outcomes — including a digital display solution now deployed across 20,000+ devices worldwide. Deep expertise in real-time technologies (WebSockets, WebRTC, Socket.io), UI animation, and performance optimization. Currently pursuing a Master's degree in Human-Computer Interaction (HCI) at Aalto University, reinforcing a commitment to user-centered design and evidence-based product thinking.

PROFESSIONAL EXPERIENCE

FRONTEND DEVELOPER

Dec 2024 – Present · 1 yr 6 mos

EWQ · Full-time

Helsinki, Uusimaa, Finland · Hybrid

- Contributed to multiple flagship products including Queue Management Systems (QMS), Digital Displays, and ESL Labels, supporting innovation across EWQ's product line.
- Played a key role in the Digital Displays initiative, directly impacting 20,000+ deployed displays, leading to a significant sales breakthrough.

SuperQueue — Latest QMS

- Collaborated with colleagues to design the full system flow, develop backend services, and create an intuitive, accessible UI.
- Successfully launched the product; now deployed in 3 stores with strong adoption and high scalability potential.

Legacy QMS

- Enhanced and maintained earlier queue management solutions in use across hundreds of stores, ensuring system reliability and business continuity.

Portal System

- Developed features for an internal and external management platform, improving operational efficiency and client accessibility.

TECHNICAL TEAM LEAD

Sep 2021 – Nov 2024 · 3 yrs 3 mos

OneStream Live · Full-time

Espoo, Uusimaa, Finland · Remote

- Developed user interfaces for both legacy and new websites, ensuring smooth rendering and fluid animations.
- Implemented WebSocket for video-streaming flow and designed dynamic pre-defined video layouts for the live streaming platform.
- Demonstrated deep proficiency in WebRTC, applying it across real-world streaming product scenarios.
- Collaborated with GStreamer authors, contributing to improved project quality through cross-team technical alignment.
- Coordinated with cross-functional teams to address complex technical challenges and drive effective problem resolution.
- Applied systematic optimization techniques to elevate overall product performance and quality.
- Worked across multiple products — website, studio, and mobile applications — demonstrating versatility and a comprehensive skill set.

SOFTWARE DEVELOPER

Feb 2021 – Aug 2021 · 7 mos

Saufik (Pvt) Limited · Full-time

Islamabad, Pakistan

Played a key role in the React Native team, contributing to mobile applications for clients across multiple domains:

- Led development and execution of three bespoke projects, demonstrating proactive, hands-on involvement throughout the full lifecycle.
- Engineered a robust real-time chat system, seamlessly integrated with Socket.io for enhanced live communication.
- Integrated payment systems (Stripe and Plaid), streamlining secure and reliable financial transactions in-app.
- Implemented push notification functionality using Firebase, improving user engagement and app responsiveness.
- Successfully launched and maintained live mobile applications: *GoParent* and *Calimatic Ed Tech*.
- Created a custom dynamic bottom bar navigation; enhancements contributed to a measurable reduction in negative user reviews.
